Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed on 5/26/2006 has been considered.

Specification

3. The abstract of the disclosure is objected to because it contains more than one paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

4. Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are confusing and misleading. For instance, the claim recites "...device for receiving data which has been converted into a digital signal...". It is not clear whether the --data-- is "the input original data" or "the resultant data". It is not also clear whether the resultant data is "the converted data" or the "compressed data". In addition, for the --data-- to be converted into --a digital signal--, it must have been in analog format.

Please clarify.

Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter: Nakano does not teach a signal processing method that thins the original data

Art Unit: 2819

into thinned data having a sampling interval different from a sampling interval of the digital data, that analyzes the original data in predetermined constant interval, that selects either the original data or the thinned data to be written into memory based on a particular criterion which is determined by comparing a result of calculation of a feature amount of each piece of data within each predetermined interval, with a predetermined threshold that changes based on the original signal; the particular criterion is defined as a sum value or maximum value of absolute differential values between adjacent piece of data within each predetermined sampling interval of original data; or a sum value or maximum value of second order derivatives between adjacent piece of data within each predetermined predetermine sampling interval of original data.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peguy JeanPierre whose telephone number is (571) 272-1803. The examiner fax phone number is (571) 273-1803.
